inhabitants per km²

Geographical areas:

- **North:** Piemonte, Valle d'Aosta, Liguria, Lombardia, Trentino-Alto Adige, Friuli-Venezia Giulia, Veneto, Emilia-Romagna
- **Centre:** Toscana, Lazio, Umbria, Marche
- **South:** Abruzzo, Molise, Campania, Basilicata, Puglia, Calabria, Sicilia, Sardegna

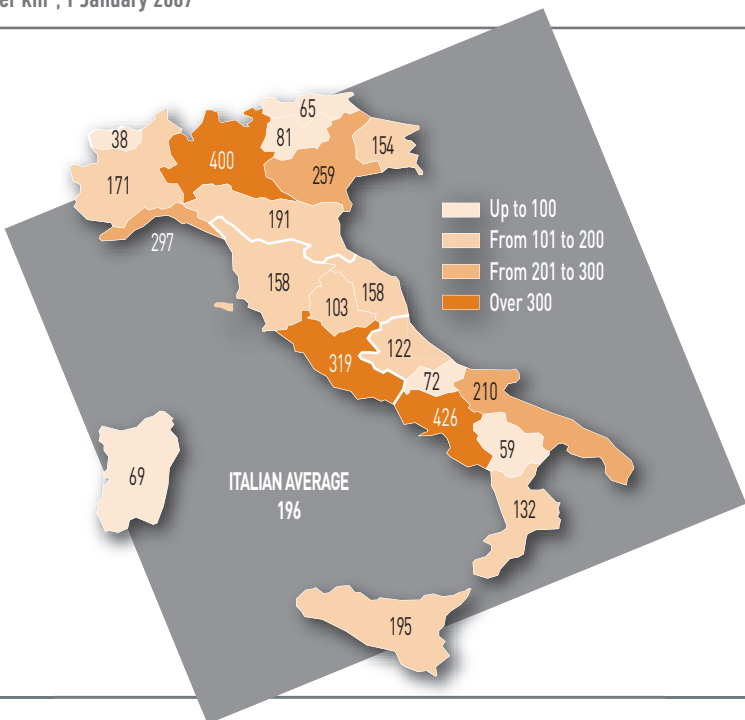

Resident population: Italian and foreign citizens registered in the municipal Register Offices, even if they were absent on the considered day because they were abroad or in another municipality

ITALY'S NUMBERS

Main territorial and demographic data

Latitude North	47° 06'	Longest river - Po (km)	652
Latitude South	35° e 30'	Railway network (km)	16,295
Longitude West	-5° e 50'	Road network (km)	175,430
Longitude East	6° e 04'	Regions	20
Maximum span (km)	1,200	Provinces	107
Territorial surface (km ²)	301,336	Municipalities	8,101
Total surface of woods (km ²)	68,571	Resident population	59,131,287
Total length of sea coasts (km)	7,375	Resident foreigners	2,938,922
Surface at high seismic risk (km ²)	27,645	Number of households	23,907,410
Protected areas (km ²)	57,325	Households' average members	2.5
Highest mountain - Monte Bianco (m)	4,810	Population density (inhab./km ²)	196

RESIDENT POPULATION DENSITY

Inhabitants per km², 1 January 2007

Natural balance: difference between the number of births and the number of deaths among the resident population occurred both in Italy and abroad

Registration and removal balance: difference between the number of new registrations in and the number of removals from the Register Offices among the resident population occurred in Italy. New registrations and removals may be due to relocation from/to another Italian municipality; or relocation from/to a foreign country; or other reasons

Residence permits: all foreigners who are legally present in Italy, i.e. holders of a valid document issued by the Italian police authorities, with the relevant exception of minors who in the majority of cases do not have their own permit and are recorded in their parents' papers

**RESIDENCE PERMITS
1 JANUARY 2007**

Municipal waste:

- household waste, including bulky ones
- non-hazardous waste similar to municipal waste in type and quantity
- waste from street cleaning
- greens waste from parks and gardens
- waste from cemeterial activities

Separate waste collection: waste is assembled into homogeneous groups of similar materials for re-use, recycling and recovery of raw materials

* data are influenced by a lesser taxation for new cars registration

Average monthly expenditure: the family's average expense for consumption. It is calculated by dividing the total expenditure by the number of households. In 1968 it was 147,000 liras (75.92 euro, value at current prices), about 30 times less than the one of 2006 ; it's stable the territorial difference between 1968 and 2006, whereas the average expenditure of the families in the South was about 70% of that of the families in the North

Average expenditure for purchase of goods: calculated by dividing the households' total expenditure for a good (or service) by the number of households that have purchased the good (or service)

Reference person: the family head as recorded in the Register Office

LIVING STANDARDS 7

Sport practise: in 2007, 20.6% of population aged 3 and over (over 8 millions of people) practised continuously one sport, 9.6% did it discontinuously. People who do not did any sport amounted to 39.5%: 44.2% of women and 34.5% of men. The trend on sport practise (available since 1982 for continuous sport activities and for persons aged 6 and over) highlights that participation has come back to rise after the slowdown registered between 1988 and 1995 (from 23% to 18%). The percentage of population aged 6 and over practising sport was quite stable between 2003 and 2007

Civil action: proceeding aimed at settling a controversial juridical relationship

Criminal action: proceeding aimed at ascertaining and sanctioning the criminal responsibility for an offence. The data refer to incoming and closed proceedings handled by all first and second instance legal offices during the various trial phases. Hence, each proceeding could be counted more than once based on the office that handled it

Average duration: ratio between pending civil action (initial+ending) and incoming and closed as per 365

Litigation rate: ratio of the number of first instance civil action to average resident population, per 1,000

Convicted to prison: person sentenced to detention for having committed an offence rated as crime

Interned: person sentenced to detention in special institutions (criminal psychiatric hospital, treatment and surveillance centre, etc.)

EXPENDITURE ON HEALTHCARE BY SECTOR

2002-2007, billions of current euro

Legal induced abortions: there has been a sharp reduction since Law n°. 194/78 made induced abortions legal in Italy. 1982 and 1983 has been the peak years, with a number of interventions exceeding 230,000 per year and an abortion rate of 16.7 and 16.4 respectively per 1,000 resident women aged 15 to 49. From that moment on, the number of induced abortions and the abortion rate progressively reduced until reaching 9 per 1,000

Body Mass Index (BMI): determined dividing the body weight in kilograms by the squared height in meters. A BMI under 18.5 is considered underweight, one of 18.5-24.99 is considered a healthy weight, one of 25-29.99 is overweight and one of 30 or more is obese

The reform of the university system: as stated in Law n.127/97 and Law n.5094/99, academic courses are organised in two cycles according to the so called "3+2" formula. The first three-year cycle leads to a 1st level degree; the second one, lasting two years, enables students to achieve a 2st level degree.

The "unique" formula courses (5 or 6 years), equivalent to the old long-programme courses, are still in force for architecture, civil engineering, pharmacy, dentistry, veterinary science and medicine; Law n. 270/2004 stated a unique formula also for law courses

EMPLOYED BY BRANCH AT CENSUS 1931

Labour force survey: sample survey of employed, job-seekers and main labour market aggregates. Data are collected by interviewing 300,000 resident households per year. People permanently living abroad, in communities, religious institutes, barracks and similar are therefore not included in the survey. Starting from 2004, the survey is carried out on a continuous basis as data are collected in every week of the year, although the results are published every three months

Labour force: employed and job-seekers

Gross Domestic Product (GDP): final result of the production activity of resident producer units. GDP at market prices is the sum of gross value added of all resident producers at basic prices plus taxes and less subsidies on products

Value added at basic prices: difference between total production and intermediate consumption used in production

Full-time equivalent unit (FEU): these are calculated by converting into full-time units all work positions each person performed during the reference period

FISCAL DRAG IN SOME EUROPEAN COUNTRIES

2002-2006, % of GDP

Source: Eurostat, European Commission * Italian data are update to 2008 National Economic Accounts

Output prices index: refers to changes in time of prices applied by industrial enterprises, excluding construction companies. The index with basis 2000=100 is calculated by monitoring the prices of a basket of industrial products (1,102 items) by a sample of 3,600 companies

Consumer prices index: measures the changes in the price of a basket of goods and services in time. Istat adopts three consumer price indices:

- total Italian community consumer price index (NIC), which covers the consumption of the entire present population

- index of households of wage and salary earners (CPI), which covers the consumption of households having an employee as a reference person

- harmonised consumer prices index (HICP), which refers to the general community of households present but the survey is restricted to the consumption of goods and services with comparable prices in the various EU countries

NON EU COUNTRIES

Exports 143,230

Imports 158,423

EU COUNTRIES

Exports 215,403

Imports 209,658

millions of euro

*provisional data

Foreign trade: foreign trade statistics are obtained from two surveys that cover Italian trade with EU countries and with other countries respectively. The survey on trade with EU countries, defined according to the Intrastat system (introduced in January 1993) is implemented on a monthly basis. Reports are submitted directly to the customs offices concerned by territory. The survey on trade with non-EU countries takes into account customs entries (single administrative document), on a monthly basis

Standardized balance: ratio between the current balance and the sum of imports and exports. Its value varies between -100 (only importing country) and +100 (only exporting country) and is null (void) when the trade balance is in draw

*provisional data

Farm survey: as stated in Council Regulation (EC) no. 2139/04, in 2005 Istat made a sample survey on number and structure of farms in Italy. To compare data in European Union countries, the survey's observation field refer to the EU universe, made up of all the farms with at least one hectare of used surface or with a minimum of sold production

Farm Holidays: agricultural farms offering hospitality, by previous municipal authorization. They have modified their own firm structures to carry on the activities of accommodation, catering and testing

WORKDAYS IN FARMS BY LABOUR TYPE IN 2005

Farmer	135,927,802
Spouse	39,270,959

HARVEST OF WINE GRAPES 2006, thousands of quintals

HARVEST AND PRODUCTION OF MAIN WOODEN CROPS

1926 and 2006

* included olive for direct consumption ** included wines obtained from wine-making of table grapes

Enterprises: organisations carrying out economic activities at a professional level for the production of market goods or services

Workers: employees (full time, part-time or under training and employment contracts) and self-employed working for enterprises

Cost of labour: includes all the items that make up the gross remuneration of the employed staff (managers, directors, employees, blue-collar workers, salespersons, trainees and home workers): basic wage, cost-of-living allowance, overtime, holiday pay, and severance pay shares

Manufacturing activities: include food industry, textile and clothing industry, leather industry, wood industry, print and publishing industry, rubber and plastics industry, manufacturing of electric machinery and electric and optical equipment, oil industry, chemical industry, non-ferrous and ferrous metal processing industry and transportation industry

Value added: represents the increase in the value that the company activity brings into the value of the goods and services received from other enterprises through its own-account productive factors (work, capital and business activity). Such aggregate is obtained subtracting the sum of the costs from the total of the proceeds

Istat is present over the whole territory thanks to its **Statistical Information Centres**, the so-called CIS.

Opened in 1995 and located in every region and autonomous province, they offer numerous services to meet the needs of every type of user.

It is possible to consult and buy all publications, as well as:

- receive help in searching for official statistical data
- request customised statistical elaborations
- consult and buy all publications of Istat
- consult Istat's databases
- obtain certificates on consumption price indices
- subscriptions

This easy-to-read leaflet portrays Italy to let people know more about its identity and transformations. Divided into 16 themes, it synthetically describes the main economic, demographic, social and territorial aspects as well as some basic behaviours and uses of its population.

Thanks to its details, glossaries and brief methodological notes, everybody can make good use of the informative wealth.

Distributed to the media, opinion leaders, international institutions, you may freely obtain a copy at the statistical information centre of your Italian region or request a copy to the Communication Office of Istat. Alternatively, you may download its complete version or browse each charter from the website homepage www.istat.it.
