

Industrial producer prices

January 2009

The industrial producer price index measures the evolution of output prices for goods manufactured in Italy and sold on the domestic and non-domestic markets. Since January 2009 the indices are calculated with reference to the base year 2005 using the new Ateco 2007 classification (Italian edition of Nace Rev. 2).

In January 2010 the total producer price index increased by 0.6% with respect to the previous month; the index of producer prices rose by 0.6% in domestic market and by 0.5% in non domestic market. The percentage change of the average of the last three months compared to the previous three months was +0.5 (+0.6 in domestic market and +0.1 in non domestic one).

The index fell by 0.3% compared with January 2009 (–0.3% both in domestic market and in non-domestic market).
