

Industrial production index

November 2009

The index measures the variation over time of the volume of industrial production (excluding construction). Since January 2009 the indices are calculated in relation to the base year 2005 using the new Ateco 2007 classification (Italian edition of Nace Rev. 2).

In November 2009 the seasonally adjusted industrial production index increased by 0.2% compared with the previous month. The percentage change of the average of the last three months compared to the previous three months was -0.1.

The calendar adjusted industrial production index fell by 7.9 % compared with November 2008 (calendar working days being 21 versus 20 days in November 2008); in the period Jan.-Nov. 2009 the percentage change was -18.4 compared with the same period of 2008.

The not adjusted index of industrial production declined by 5.2% compared with November 2008.

Indices of industrial production (a). November 2009 (b)

Indices	Index (2005=100)	Percentage changes on the previous period		Percentage changes on the same period of the previous year	
		Nov 09	Sep - Nov 09	Nov 09	Jan - Nov 09
		Oct 09	Jun - Aug 09	Nov 08	Jan - Nov 08
Industrial production seasonally adjusted	85.4	+0.2	-0.1	-	-
Industrial production calendar adjusted	92.1	-	-	-7.9	-18.4
Industrial production not adjusted	93.0	-	-	-5.2	-18.5
<i>Calendar working days</i>	21				

(a) Excluding construction.

(b) Data are provisional and subject to revisions. The first revision takes place with the dissemination of the following month and takes into account additional information received from enterprises; further revisions are published every six months (when February and October data are disseminated).
